

Data buoys and loggers

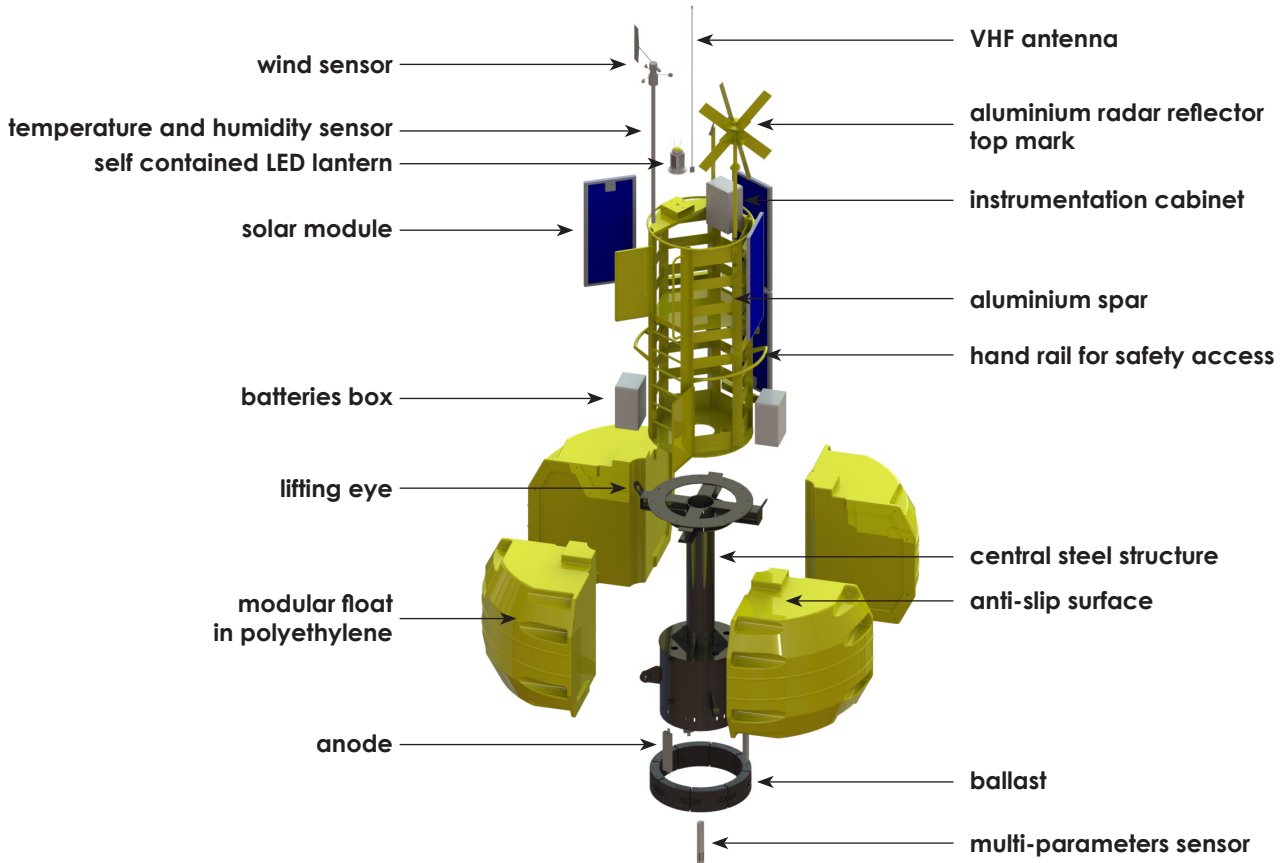

With a wide range of floats and spars, GISMAN is able to offer custom-made solutions with different types of electronic devices and ocean-weather sensors to be fitted on buoys.

For additional information, please ask for our specific leaflet.

- Polyethylene float selected in our range (from 0.9 to 3m diameter) after analysing the site conditions
- Custom-made spar in polyethylene or aluminium, ready to receive the different sensors
- Selection of sensors in close collaboration with specialising companies and according to client specific requirements
- Mooring system calculated in accordance with the site conditions to provide the best stability at sea for a reliable data acquisition

Example of GISMAN data buoy with 3m diameter float
